It would be nice to be open "24/7" wouldn't it? How about making sales "in your sleep"? While you're at your son's baseball game. While you vacation in Hawaii! Everyone wants their own e-commerce website. Chances are you do too. "But what is involved?", you ask. "I'm already too busy - how will I find the time, skill, and money to build a website? And even if I could answer that how can I keep track of my store and my on-line Internet e-commerce website?"

Introducing POSitive Commerce

It's 6am on a Sunday morning and your store just made a sale - to a customer three states away! POSitive Commerce made this possible.

For less than \$3 a day, about the cost of a latte', your store is open for business and ready when your customers want to shop. A professional e-commerce site is simply the most cost-effective way to expand the size and reach of your store.

We conceived POSitive Commerce with one goal - to make creating and managing a web site for a retail store owner as simple as possible. We build a professional web site for you, so you don't have to know anything about web site hosting. Using POSitive retail software, one-click moves the inventory you choose from your store to the web. One more click, and you're retrieving orders directly from your web site into POSitive retail software. Very simple, very easy to use!

POSitive Commerce seamlessly integrates with POSitive Retail Manger and POSitive For Windows point-of-sale software. You control which of your inventory items get posted to the internet through the same program that runs your store. And you don't have to know anything about how to program a web site to do it!

POSitive Commerce is based on Joomla and VirtueMart which are both open source products. We've added some proprietary modules to allow a direct link to POSitive's products and we also require that POSitive Commerce be hosted on our web servers. Our staff will handle the initial set-up of each client's e-commerce service.

For a low monthly fee, you'll receive:

-

Your own web site with shopping cart

-

Free program updates

-

Free technical support for your web site

Additional services are available at reasonable rates.
