

SAM4S

SPS-2000

Touch Screen ECR For Quick Service Restaurants

- Touch is Intuitive
- Touch is Easy to Use
- Touch Promotes Savings
- Touch is the Fastest Way to Input Transactions

SAM4S

Designed For Reliability

No Hard Disk Drive

By using compact flash memory instead of a hard disk drive, the SAM4s SPS-2000 is inherently more reliable and requires less maintenance.

EPROM Program Storage

The SPS-2000 application program is bundled with each terminal and preloaded in EPROM, providing exceptional reliability, stability and speed – with significantly faster booting than traditional PC-based POS.

No Single Point of Failure

Each SPS-2000 is fully functional without a server or network, meaning that there is no single point where an unexpected failure could completely disable your system.

Quiet Fanless Operation

With no fan to draw contaminants into the register, the SPS-2000 will perform better and last longer.

View vivid colors with the super-bright 12.1" TFT LCD touch screen.

Receipt, shown 50% actual size, printed by the optional SAM4s Ellix 20 high-speed thermal printer with watermark.

Popular POS Components Included – Not Added On

Each SPS-2000 includes a magnetic card reader and a rear customer display. These essential components are significantly more expensive when added on to a bare-bones terminal.

Rear Display

The rear display allows consumers to monitor prices as items are entered and view the sale total.

Magnetic Card Reader

Use to swipe payment cards when integrated payment options are implemented, or to log or clock in employees.

Easy Save/Load

Store programs or collect reports with the SD memory card port or USB port.

Easy to Access Ports

Connect to a wide array of compatible off-the-shelf POS peripherals with six serial ports and two USB ports.

Designed For Quick Service

Quick Service Features

- Store and Recall Drive Through, Phone-In, and Delivery Orders
- Up to Ten Different Modifier Keys Can Be Used to Describe and Price an Item
- Promo and Waste Functions Keep Inventory Records Accurate

Product Mix Groups and Projections

- Track Usage of Key Inventory Items Such as Pieces, Patties or Cups
- Report Usage by Time Period
- Projection Reports Improve Customer Service and Reduce Waste

Item and Ingredient Inventory

- Basic Menu-Explosion Inventory Included
- Build Recipes, Ingredients and Their Costs
- Enter Receipts, Transfers, Waste and Shelf Counts
- Reports Detailed Usage, Food Cost Amounts and Percentages

Delivery Customer Database

- Store Customer Records and Recent Order History
- Recall Delivery Orders by Phone Number
- Enter New Customers on the Fly
- Store Up to 9999 Customer Records and 11 Information Fields
- Poll Customer Data for Direct Mail Marketing

Powerful Kitchen Video Requisition System

- Drive-Thru, Food Preparation or Expeditor Applications
- Send Items Real Time to Speed Service
- Multi-Color Display
- Eight or Four Order Screen Formats
- Split Screen Format Separates Drive-Thru and Counter

- Park Drive-Thru Orders for Preparation
- Order Timing and Reporting
- On Screen Key Item Counts

Keylink Menu Screens

Menu items, condiments, flavors, instructions and options can be placed upon one of 200 40-key layouts called "Keylinks". When an item is registered, a specific keylink displays the options available for the item. You can control how many choices can be made as well as what options display next. Keylinks can be designed to lead operators through order sequences and provide a great opportunity to suggestively sell.

SAM4s SPS-2000 Touch Screen ECR For Quick Service Restaurants

Insure Speed, Security and Efficiency with Integrated Credit, Debit and Gift Card Payments

Both cash and electronic payment sales can be processed in a single step at the SAM4s SPS-2000 with an optional DataTran™ integrated payment terminal.

- The SPS-2000 is electronic payment and gift card processing ready – no additional software modules are required.
- Free gift card processing is available through selected processing partners.
- Fast 2-Second IP Processing can be completed using an IPTran™ terminal or PC equipped with IPEnabler™ software and a persistent Internet connection.

Standard Network Support

Up to 32 terminals can be connected in a fast and reliable Ethernet-style network. Networking supports report data consolidation, terminal programming, payment authorizations, printer and video requisition routing.

Time and Attendance

A fully featured time and attendance system provides payroll ready data for your in-house payroll system or payroll service. Built-into your POS system, you get critical labor reporting, including sales/labor percentage and sales per man-hour. Information is easily accessible by store managers for real time staff management.

Remote Polling

Poll by dial-up or ethernet connection. Companion software for your PC, SAM2000, supports your POS application by first polling sales information from individual ECRs, ECR networks or multiple remote locations. In your office SAM2000 provides item file management and inventory functions. You can easily add or delete menu items and send new menu screens to your restaurants for daily, weekly or seasonal promotions.

ITEM	GROUP#	COUNT	PLU#	TOTAL
FRUIT BUST PARF	00000000000000000000	2700		9.23%
#21/#90/#00	45			\$71.88
MD FREEZE	00000000000000000000	2113		18.60%
#21/#90/#00	44			\$144.76
HOT DOG	00000000000000000000	1100		5.13%

CHILLI DOG	00000000000000000000	1110		4.99%
#11/#91/#00	24			\$38.88

System Reports

Over sixty system reports are available for financial and sales analysis. Reports can be viewed on the ECR screen, printed at a local printer, or polled remotely. Sales information can be simultaneously collected on up to five different levels: for daily, weekly, monthly, quarterly or yearly record keeping.
